

FDOTSS2 Maintenance Release 4 (MR4)

Installation Instructions

FDOTSS2 MR4 can be installed in one of two methods. The first method is to upgrade an existing installation on a server or stand-alone workstation. The second method is to do a full install for new installations.

UPGRADE EXISTING INSTALLATIONS

To upgrade an existing installation:

1. Download the “Server Update” from the FDOTSS2 CADD Software Downloads page at:
<http://www.dot.state.fl.us/ecso/downloads/software/FDOTSS2CaddSoftware.shtm>
2. Extract the contents of the zip file into the \FDOTSS2 directory on the server or stand alone workstation

NOTE: When updating the FDOTSS2 directory, ensure that all clients have closed MicroStation and Electronic Delivery software before extracting the zip file. If any of the files in the FDOTSS2 directory are in use when the zip file is extracted they will not be updated properly.

FULL INSTALLS FOR NEW INSTALLATIONS

If you are doing a new installation of a Server, Client, or Workstation you can download and execute a full install that has been updated to include all of the latest files.

To do a full install on a new computer:

1. Download the “Server Only Install”, “Client Only Install”, or “Workstation Only Install” from the FDOTSS2 CADD Software Downloads page at:
2. <http://www.dot.state.fl.us/ecso/downloads/software/FDOTSS2CaddSoftware.shtm>
3. Execute the install following the instructions provided in the “Installation Instructions” which are available online at:

<http://www.dot.state.fl.us/ecso/downloads/software/Files/FDOTSS2/FDOTSS2InstallationGuide.pdf>
